***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: Claim 1-40 are considered allowable since when reading the claims in light of the specification, none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claims, for claim 1, specifically the combination of calculating a minimum energy connection in curved space from said cell in said intermediate layer to said cells in said intermediate layers (Defined Pg. 43-44, particularly paragraphs 0139) in combination with the loading, updating, and mapping steps of claim 1 (Figure 17, Defined pg.51-52, paragraphs 0165-0169).

For Claim 11, specifically the combination of comparing values of cells in said intermediate layers with values stored in cells of adjacent layers through curved space and the use of a vibration wave into a cell of said input layer in combination with the loading, updating, and mapping steps of claim 11.

For Claims 21 and 31, the reasons for allowance are the same as those given for claims 1 and 11 respectively, as these claims are apparatus claims with means for language of the method claims of 1 and 11.

Claims 2-10, 12-20, 22-30, and 32-40 are allowable as being dependant upon an allowed claim.

The drawings submitted 4/6/2005 lack Figure 17 which is used in the specification. For the sake of examination, Figure 17 submitted 3/29/2004 will be used. Examiner requests that the applicant submit a completed set of drawings including Figure 17 in response to the allowance.

The claims are statutory because they disclose methods and apparatuses designed to be used in conjunction with a digital computer (see pg.13, paragraph 0037).

The practical application is disclosed on pg.3, particularly paragraph 0009, disclosing the use of this method for pattern recognition, image analysis, or information mapping.

The closest prior art, Lozo et al (WO 97/04400) discloses loading an input pattern into the input layer, loading a memory pattern into a memory layer, and loading initial values into an intermediate layer, comparing values of cells in said intermediate layers with values stored in cells of adjacent layers, and updating and mapping the cells in the intermediate layers based on the comparing, but fails to discuss curved space or minimization of energy as disclosed in claims 1 and 21 or the discussion of a vibration wave as disclosed in claim 11 and 31.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
